EXPERIENCE

TCG's applications and IT services help develop a transparent, efficient, and ethical government. With over 30 years of work in the Federal sector, our influence can be found across all of government.

MISSION ALIGNMENT

Our work for Federal agencies is part of our mission as a Certified B Corp to have a positive impact on the country and our communities. This means that the success of TCG rests on how well the tools, products, and services we deliver support and accelerate the missions of Federal agencies.

Collaboration is integral to our processes, enabling us to apply the right approach for each unique context and execute our work efficiently to deliver value.

Powering Your Mission

MAX.GOV (OFFICE OF MANAGEMENT AND BUDGET)

SUCCESS STORY

MAX.gov is a set of Federal shared services that provides users across government with tools for collaboration, authentication, data collection, and business intelligence. Since 2004, TCG has supported MAX.gov with program and project management, technical architecture, tools development, and partner management.

- 300,000 users across 200 federal agencies
- Over \$140 million saved in development costs through shared service model
- 190 collaboration spaces with 70,000 active pages
- 85,000 PIV/CAC cards.

FEDERAL COMMUNICATIONS COMMISSION

SUCCESS STORY

TCG worked with the FCC to implement a cloud-first architecture for their Electronic Comment Filing system, ensuring that it would be “infinitely scalable” to meet future surges in demand, and assure the public and Congress of the security of data submitted and received. After the launch, ECFS was put to the test and passed with flying colors. Within a week, ECFS had accumulated 70,000 comments originating from petition signatures, with the number eventually reaching 95,000. Yet, the increase in traffic barely registered for the ECFS team. Though the spike was noted, ECFS response time never wavered as the system scaled automatically to meet the demand.

U.S. INTERNATIONAL TRADE COMMISSION

SUCCESS STORY

TCG supports 5 mission-critical systems with 54,430 users, providing software development support that maximizes resources, and continually improves quality and efficiency of systems and processes. Applications must manage complicated data sets needed by an expansive group including single inventors, small and medium-sized businesses, government officials, large multinational corporations, and unions representing thousands of workers. Our Agile development process incorporates best UX practices, ensuring we build the right system with the least number of iterations with constant feedback along the way.
